- Roads from Census Bureau

The Details windows has more information for the map layers as well as their source.

The Print tool is selected in the toolbar.

Add custom title

Print

The print tool allows you to convert the map into a PDF document which can be used for printing. The print tool will use the current map extent to generate the PDF. Use the drop down arrow next to the print button to select the size. Clicking the print button will generate the PDF. It will take a few minutes.
